

Josh Clemens

Full stack web developer passionate about designing user interfaces that are intuitive to understand and use.

EXPERIENCE

RIT Co-op — App Content Writer

JANUARY 2023 - MAY 2023

Wrote new and edited existing content for an AR mobile game exploring the history of RIT and the City of Rochester.

Highlights

- Thorough fact-checking and editing of existing work
- Creation of new text content based on historic records

RIT Co-Op — Full Stack Web Developer

MAY 2023 - AUGUST 2023

Designed and built a website showcasing the rich cultural history of the Rochester graffiti movement.

Highlights

- Custom SvelteKit website reflecting stakeholder needs
- Component-based architecture for easy hand off to future devs

CAPSTONE PROJECTS

HCD Hub — Solo Project ([GitHub](#))

Designed and built a website to showcase the capstone projects for students in the major, with an emphasis on documentation and composability to enable future students to add more features as needed. Uses a Strapi headless CMS backend.

Teaching Tech Lit — Group Project ([GitHub](#)) ([Link](#))

Implemented design of a site intended to teach the “meta-language” of technology to people unfamiliar with general concepts widely used across software and hardware platforms.

Marketplace Melee — Group Project ([GitHub](#))

Designed and implemented a TypeScript WebSocket backend for a digitally-enhanced board game's companion web app.

Rochester Subway Archive — Group Project ([GitHub](#))

Designed and implemented a website showcasing historic artifacts related to the Rochester Subway, a critical feature of the city's history.
